Volume 2 Subject Index

A

Adrenocorticotropin and other hormones in multipotential pituitary cell 112
Adrenal hyperplasia, congenital, and isolated gonadotropin deficiency 123
Adrenoleukodystrophy in children and adults 49
Adrenoleukodystrophy presenting as Addison's disease 49
Amyloid polypeptide, islets: cause of type-2 diabetes? 203
Anti-Müllerian hormone and intersex states 227
Antisteroid RU 486: cellular and molecular mode of action 233

B

Bioactive follicle-stimulating hormone 145
Body weight, body fat, and ovulation 191
Book Reviews
Adipose tissue and reproduction 44
Alcohol metabolism, alcohol intolerance, and alcoholism: biochemical and pharmacogenetic approaches 120
Calcium metabolism (Prog Basic Clin Pharmacol, vol 4) 240
Chronic pancreatitis: research and clinical management 200
Diabetes mellitus, theory and practice 41
Dietary fiber in prophylaxis and therapy of disease. A review: dietary fiber research (Prog Biochem Pharmacol, vol 24) 198
Disturbed secretion and its effects 241
Endocrine hypertension: comprehensive endocrinology 157
Endothelial cell function in diabetic microangiopathy 158
Fatty-acid oxidation 45
Growth factors: from genes to clinical application 118
Hormonal regulation of growth (Serono Symposia, vol 58) 158
Human spermatozoa in assisted reproduction 118
Molecular endocrinology and steroid hormone action 77
Neurochemical aspects of phospholipid metabolism (Fidia Research Series, vol 20, revised) 159
Osteoporosis: physiological basis, assessment and treatment 77
Pediatric endocrinology, 2nd ed 199
Progress in comparative endocrinology 78
Reproduction, adipose tissue and 44
Socioendocrinology of primate reproduction 240
Structure–function relationships of gonadotropins (Serono Symposia, vol 65) 198
The adrenal and hypertension (Serono Symposia, vol 57 78
Brain hypophysiotropic factors: morphologic aspects 219
Brain, insulin in the 9
Brain, steroid hormones are multifunctional messengers to the 62
Breast cancer, hormones and 72

C

Cancer of breast, hormones and 72
Congenital adrenal hyperplasia and isolated gonadotropin deficiency 123
Congenital hypothyroidism, screening for 129
Cytokines, tumor necrosis factor, and hyperlipidemia of infection 213

D

Diabetes mellitus, study in transgenic mice 97
Diabetes, type-2, due to islet amyloid polypeptide? 203
Diabetic complications, role of *myo*-inositol 187
Dwarfism, Laron type, molecular basis 35

E

Follicle-stimulating hormone, bioactive 145

G

Gene mapping in MEN 2: impact on management 19
Geriatric Graves' disease 4
Gonadotropin deficiency, isolated, and congenital adrenal hyperplasia 123
Gonadotropin gene expression, intracellular signaling pathways 181
Gonadotropin-releasing hormone agonist testing of pituitary–gonadal function 86
Graves' disease in the aged 4
Growth factors, insulinlike, and their receptors as growth regulators 134
Growth hormone receptor and postreceptor defects contribute to growth hormone resistance in malnutrition 92
Growth hormone receptors, molecular biology of 176
Growth hormone resistance in malnutrition, growth hormone receptor and postreceptor defects 92
Growth regulation by insulinlike growth factors and their receptors in health and disease 134

H

Hyperlipidemia of infection, tumor necrosis factor and cytokines 213
Hyperthyroidism due to Graves' disease in the aged 4
Hypophysiotropic factors of brain: morphologic aspects 219
Hypothyroidism, congenital, screening for 129

I

Immunoglobulin A: modulation of synthesis by neuropeptides 68
Insulin in the brain 9
Insulinlike growth factors and their receptors as growth regulators 134
Intersex states and anti-Müllerian hormone 227
Intrathyroidal iodine 29
Iodine, intrathyroidal 29
Iodocompounds in thyroid, kinetic compartmentalization 29
Islet amyloid polypeptide: cause of type-2 diabetes? 203

L

Laron dwarfism, molecular basis 35

M

Macroprolactinomas, modern management 163
Malnutrition, growth hormone resistance in, role of GH receptor and postreceptor defects 92
Milk, neuroendocrine peptides in 25
Molecular genetics of thyrotropin (thyroid-stimulating hormone) receptor 151
Multiple endocrine neoplasia type 2 (MEN 2) 19
Multipotential pituitary cells contain ACTH and other hormones 112
Myo-inositol and pathogenesis of diabetic complications 187

N

Neuroendocrine peptides in milk 25
Neuroendocrine peptides modulate immunoglobulin-A synthesis 68
Nutritional rickets 81

O

Osteoporosis: basis in functional and structural skeletal aging 53
Osteoporosis: current and future

©1991, Elsevier Science Publishing Co., 1043-2760/91/$2.00

treatment 59
Ovulation: body weight and body fat, effects on 191

P

Paget's disease of bone 207
Parathyroid hormone-related peptide, measurement 1
Photoperiodicity and endocrine system: pineal as link 13
Pineal gland: environmental–endocrine link 13
Pituitary cells, multipotential, that contain ACTH and other hormones 112
Pituitary gland, renin–angiotensin system in the 104
Pituitary gonadotropin gene expression, intracellular signaling pathways 181
Pituitary–gonadal function testing with GnRH agonist 86
Polymerase chain reaction, uses in endocrinology 169

R

Renin–angiotensin system in the pituitary gland 104
Rickets, nutritional 81
RU486: cellular and molecular mode of action of this antisteroid 233

S

Skeletal aging: functional and structural basis of osteoporosis 53
Steroid hormones are multifunctional messengers to the brain 62

T

Thyroid hormone resistance syndromes 140
Thyrotropin receptor, molecular genetics of 151
Transgenic mice for the study of diabetes mellitus 97
Tumor necrosis factor, cytokines, and hyperlipidemia of infection 213

V

Vasoactive intestinal polypeptide in health and disease 107

From lab bench to bedside

TRENDS IN Cardiovascular • MEDICINE •

Editor-in-Chief:
Kenneth R. Chien, MD, PhD
University of California at San Diego School of Medicine, La Jolla, California, USA
Executive Editors:
Garret A. FitzGerald, MD
University College Dublin, Mater Hospital, Dublin, Ireland
Jeffrey M. Isner, MD
Tufts University School of Medicine, Boston, Massachusetts, USA
Judith L. Swain, MD
University of Pennsylvania School of Medicine, Philadelphia, Pennsylvania, USA

Keep up with advances in cardiovascular research that will have important diagnostic and therapeutic implications by subscribing to **Trends in Cardiovascular Medicine.** Each issue features 6-8 brief reviews of key topics at the vanguard of cardiology. Because clinical advances are often based on experimental observations, **Trends'** authors discuss how developments at the lab bench today can influence the practice of bedside medicine tomorrow.

Trends in Cardiovascular Medicine carries the following regular sections:
- ***Case Studies in Molecular Cardiology***
- ***Emerging Technologies***
- ***Brief Reviews***

Trends in Cardiovascular Medicine's editor-in-chief and executive editors select topics to be covered and *Trends'* authors, all highly regarded individuals in the area under review. All articles are subject to peer-review, ensuring accuracy in presentation. **Trends in Cardiovascular Medicine** can help you understand how today's research will change tomorrow's clinical practice.
